Dear Dr. Wilkerson,

Our run-away patient with the lead foot come clinic yesterday, We were able to get some X-Rays an A-P of the ankle joint and an A-P and Lateral of the foot.

He wanted to go home and get his things but promised to come back today and stay in the clinic.

If he comes, would you please examine him if you have time and look at his X-Rays? He will need surgery, but perhaps we can save part of his foot.

Hope to see you on Saturday morning - will arrive a little late about 1220 because I have clinic in Chiayi that morning.

Sincerely

M^E/ec

Myles Efteland
